Berkeley Skuratowicz

Mountain View, CA 94040 | 541-816-8595 | berkrose@gmail.com

SKILLS & ABILITIES

- Hands-on mechanical engineer, experienced in using CAD (SolidWorks, Autodesk Inventor, Fusion 360, Rhino) and rapid prototyping methods including 3D printing, laser cutting, and wood CNC machining.
- Comfortable with hand tools, bench equipment, and a soldering iron; embedded systems experience with Raspberry Pi and microcontrollers; strong documentation habits including SOPs and build/maintenance manuals.
- Self-directed, with experience owning projects end-to-end from initial proposal through implementation, and collaborating with external vendors and contract manufacturers on product development and manufacturing.

WORK EXPERIENCE

Makerspace Coordinator | Mountain View Public Library **Feb 2026 - Present**

Mountain View, CA

- Researched and authored a proposal to establish a public makerspace, then took it from approved concept through hands-on implementation, setting up and maintaining 3D printers, Cricut cutting machines, and electronics and coding kits.
- Writing maintenance manuals, SOPs, and staff training materials, and developing curriculum for upcoming public workshops and classes.

Engineer and Instructor | Talent Maker City **April 2023 - Aug 2024**

Talent, Oregon

- Designed, fabricated, and tested products for local businesses and makerspace operations using CAD, CNC machining, 3D printing, and laser cutting.
- Led hands-on workshops covering digital fabrication equipment, safe machine operation, and manufacturing processes for students, educators, and community members.

Product Design Intern | Blue Marble **June 2022 - Sept 2022**

Ashland, Oregon

- Designed and prototyped a motor housing and mounting system for a new leak-resistant rock tumbler.
- Collaborated with an international engineering team to develop manufacturable parts, define tolerances, and prepare designs for production.
- Investigated product failures and incorporated structured user feedback into design improvements.

Mechanical Engineering Intern | Oregon Freeze Dry **Mar 2021 - Sept 2021**

Albany, Oregon

- Designed a monorail lifting system for the safe removal and handling of a 1,700-pound industrial motor.
- Diagnosed production and maintenance problems and developed mechanical solutions in collaboration with engineers, operators, contractors, and consultants.
- Modeled a complex process-piping network to resolve sizing constraints and designed a new liquid-silicone piping system.

Research and Development Intern | Bioskin **June 2020 - Sept 2020**

Ashland, Oregon

- Improved the parts organization system for production efficiency and created exploded view drawings and BOMs in SolidWorks.

EDUCATION

Product Design | M.A. **May 2026**

San Francisco State University

- Master's Thesis: Designed an automated water and nutrient management add-on for consumer hydroponic gardens, built on a Raspberry Pi with sensors and dual peristaltic pumps running an adaptive dosing state machine.

Honors Mechanical Engineering and Manufacturing Engineering | H.B.S. **March 2023**

Oregon State University | GPA: 3.85, summa cum laude

- Honors Thesis: Mechanical Properties of Hemp Fiber Reinforced Polylactic Acid Composites.
- Capstone Project: Worked with a team of four to design and build a full-suspension carbon fiber and recycled wood composite mountain bike.
